

## Felt- coating

### characteristics

- high- tensile kevlar- felt
- colour white: temperature- resistant up to 250°C
- colour yellow: temperature- resistant up to 500°C (short time -550°C)
- deliverable for endless timing belts and open meter ware
- construction of felt joining of endless timing belts upon consultation
- also with slits for better flexibility

### application

- transport of hot goods
- aluminium- industry
- extrusion of aluminium
- glas- industry
- others
