

## **silikone- coating in FDA- quality**

### characteristics

- anti- adhesive (glue- and dirt- repellent)
- heat- resistant up to 180°C
- high- flexible
- excellent aging- resistant
- FDA conform
- high friction coefficient to steel and paper
- width up to approx. 1.000mm
- with or without joint
- different hardness and thickness
- also sealing of surfaces with silicone

### application

- food industry
- careful transport of hot goods (up to 200°C)
- covering in galvanization
- transport of adhesive goods (labeling machines)
- others
